

Air Chariot

Wednesday, 27 February 2008

AIR CHARIOT. A small one-man hover vehicle built by Dr. Mindbender, the air chariot was decorated in a snake theme and given to the newly-created Serpentor. The pilot stood while operating the craft, which was armed with two 7.62mm "Strike" attack guns. The vehicle was actually rarely used by the Cobra Emperor. Years later, a new version of the air chariot was used by the revived Serpentor while commanding his army, The Coil.
