

## Bugg

Thursday, 28 February 2008

BUGG. An amphibious attack vehicle used by Cobra. BUGGs are large, heavily-armed "tracked submarines" that could deploy a smaller two-man submarine. Its armaments included torpedoes, surface-to-air missiles and anti-aircraft guns. Each vehicle is manned by specially trained troopers known as Secto-Vipers. Satellite photos of large tracks heading into the ocean gave the US military their first evidence of Cobra's BUGGs. BUGGs were deployed into the waters around Cobra Island, and were first encountered by G.I. Joe aircraft during the Cobra Island civil war.
