

Crossfire

Thursday, 28 February 2008

CROSSFIRE. A light, fast ground vehicle used by G.I. Joe, the Crossfire could be remotely-controlled. Its armaments included top-mounted "Pumper" twin 20mm cannons, "Spinner" side-mounted auto-load 9mm cannons and two "Live Wire" SAM-19 missiles.

Duke used two remotely-operated Crossfires to distract a force of Cobras invading the Pit in Utah.

Hasbro's real Crossfire toy was actually a remote-controlled car.
