

D.E.M.O.N.

Thursday, 28 February 2008

D.E.M.O.N. A heavily-armed battle tank used by Destro's Iron Grenadier army. The D.E.M.O.N. -- Dual Elevating Multi-Ordnance Neutralizer -- has a unique design that is wider than it is long, allowing it to fire a large number of weapons at a given target. A D.E.M.O.N is typically armed with a triple lense laser, an "Infinity III" laser cannon, and six "Tri-Cap" (triple computer-assisted anti-aircraft/anti-personnel) missiles. The vehicle also includes advanced imaging and targeting equipment, and has the ability to raise itself off of its treads to allow access to targets at a higher elevation. D.E.M.O.N.s are usually driven by specially-trained "Ferrets". The vehicles first saw action during Destro's involvement in the Cobra Island civil war, in which one of them served as Destro's command vehicle before it collided with the Dreadnok Thunder Machine. The Iron Grenadiers were seen using D.E.M.O.N.s as recently as 2002, during a Cobra assault on Washington, DC.
